CCDC Inject

INJECT NAME	Implement Anti-malware Tool on End Devices
INJECT ID	SRVA07A

INJECT DESCRIPTION:
Select an open-source anti-malware tool and implement this software on the Linux and Windows devices. There may be a different tool for each platform, if needed.

INJECT DELIVERABLE
Respond with a business memo which documents the successful implementation on all the Linux and Windows platforms. Use screenshots to document the implementation on one device for each platform. List all the devices on which the tool(s) has been implemented.
